

NIDHI YADAV

Data Scientist | Machine Learning | Data Analysis

nidhiyadav99927@gmail.com | +91 7016935828 | Ahmedabad, India | linkedin.com/in/nidhi-yadav207 | github.com/nidhi-yadav20799

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience in machine learning, NLP, deep learning, and data analysis using Python and SQL. Engineered end-to-end ML pipelines for real-world problems including sign language recognition, fake news detection, and retail sales analytics. Proficient in Scikit-learn, TensorFlow, Pandas, and Power BI. Seeking internship or fresher roles in Data Science, Data Analysis, or Machine Learning to contribute to data-driven decision-making.

EDUCATION

Bachelor of Science (B.Sc.) in Data Science Jul 2023 – Aug 2026

Silver Oak University | Ahmedabad, India | CGPA: 8.91 / 10

Coursework: Statistical Methods, Predictive Modeling, NLP, Data Mining, Artificial Intelligence

EXPERIENCE

Generative AI Academic Intern Nov 2025 – Dec 2025

Technmicra IT Solutions | Ahmedabad, India

- Completed a 25-day academic internship focused on Generative AI, Large Language Models (LLMs), and Prompt Engineering fundamentals.
- Studied NLP concepts and their application in AI-driven content generation and real-world business environments.
- Observed AI model usage workflows, dataset understanding, and AI-based problem-solving approaches.

PROJECTS

Retail Insights – E-Commerce Sales Analysis | Python, Pandas, Power BI May 2026 – Jun 2026

- Analyzed 51,000+ sales records (2011–2014) from the Superstore dataset using Python and Pandas to identify sales and profit trends.
- Conducted regional profit analysis and evaluated the impact of discounts on overall profitability.
- Built an interactive Power BI dashboard highlighting top and bottom performing products to support data-driven business decision-making.

Real-Time Indian Sign Language Recognition (SilenEko) | Group Project Feb 2026 – Mar 2026

TensorFlow, MobileNetV2, OpenCV, MediaPipe

- Built a real-time hand gesture recognition system to classify Indian Sign Language (ISL) alphabets using TensorFlow and MobileNetV2 via transfer learning-based image classification.
- Implemented image preprocessing and gesture capture using OpenCV.
- Integrated MediaPipe for hand detection and cropping.
- Developed a pipeline to capture hand gestures via webcam, preprocess images, and output predicted alphabets.

Fake News Detection – NLP Text Classification | Python, Scikit-learn, NLP Dec 2025 – Jan 2026

- Built an NLP-based classification model to detect misleading news articles.
- Applied text preprocessing, TF-IDF feature extraction, and ML classifiers using Python libraries.
- Evaluated model performance using predictive metrics for improved accuracy.

SKILLS

Languages:	Python, SQL, R
ML / AI:	Classification, Clustering, Supervised Learning, NLP, Feature Engineering, Predictive Modeling, Deep Learning (basic)
Libraries:	NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib, Seaborn
Tools & IDEs:	Jupyter Notebook, Google Colab, VS Code, RStudio, Git (Basic)
Visualization:	Power BI, Tableau
Gen AI (Basic):	Prompt Engineering, LLMs, Text Generation

CERTIFICATIONS

- | | |
|--|------|
| • AI Career for Women – Edunet Foundation | 2026 |
| • Data Analytics Job Simulation (Tableau, Excel) – Deloitte Australia / Forage | 2026 |

- | | |
|--|------|
| • Deep Learning – Elite Grade – NPTEL / IIT Ropar | 2025 |
| • Machine Learning Using Python – Simplilearn | 2025 |
| • R Programming for Beginners – Simplilearn | 2025 |
| • Business Analytics with Excel – Simplilearn / Microsoft | 2025 |
